

Product Code: 700052

## Water Leakage/ Flood Sensor

Innovative protection against water damage

Reliable liquid detection

Additional probe extension cable

Placing on the bottom or  
on the wall (with extension)

Akoustical alarm

Optical alarm (color LED)

Waterproof (IP44)

A broken hose at the washing machine or a leaking pipe at the water tap. Even if there is only a small leakage it can cause a big damage. Don't worry: The **POPP Water Leakage/ Flood Sensor** is protecting you from that. But elsewhere it can also take work from you and informs for example when the water level in the pool or the fish tank sinks.

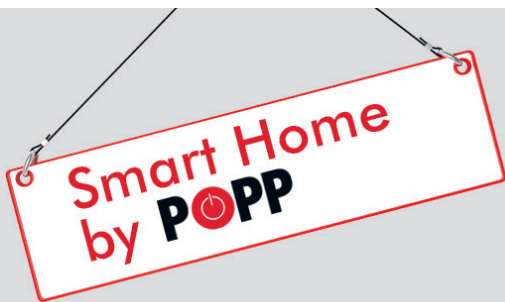

As soon as the device detects water at his probes an acoustic alarm is triggered. Additionally, the LED starts blinking and the alarm signal is sent to the Z-Wave gateway. Because of that, you receive a message on your smartphone and you can act immediately even when you are not at home. Therefore you can prevent high damages because of water.

Connected to other smart devices like the POPP Flow Stop you can even turn off the water automatically, if there is a leakage in a water pipe.

The POPP Water Leakage Sensor can be placed underneath a washing machine or a sink. If there is not enough space for the main device you can use the included sensor cable with extra wall mounting plate. The sensor is water resistant and floats (protection class IP44). Thus, it is also suitable for outdoor use.

Dimensions: 66x66x23 mm

Weight: 80 g

-  Heating and Climate Control
-  Security Systems
-  Lighting Control
-  Alarm Systems
-  Remote Controls
-  Control Center/ Gateway
-  Sensors
-  Device Control/ Plugs
-  Window and Blind Control

With POPP products your home will become intelligent. Control your house or apartment by tablet pc, desktop pc, smartphone or remote control. Activate the heating when you're heading home, close your windows automatically if the weather changes and receive short messages when sensors set off any alarm at home.

For its smart home products POPP trusts Z-Wave technology. Z-Wave is the international leading standard for wireless communication between intelligent devices in homes and offices and thereby the basis for successful home automation.

POPP smart home products are compatible and interoperable with Z-Wave certified devices from more than 300 manufacturers worldwide.
