Walli Controller

A beautiful smart Z-Wave remote controller that can activate scenes and interact with the devices.

- Can be used for controlling multiple types of devices, e.g. switches, dimmers, roller shutters.
- Pre-set configurations allow to easily adjust operation for specific type of controlled devices.
- Battery or VDC powered. Equipped with a built-in temperature sensor.
- Compatible in both aesthetical and technical way with other FIBARO and Z-Wave devices.
- Works as a Z-Wave signal repeater when VDC powered (all non-battery operated devices within the network will act as repeaters to increase reliability of the network).

Walli Controller is so much more...

power sources

can stand

~7k

key clicks on a single battery

Walli Controller – Use cases

FIBARO

Goodbye! – smart leaving

You can put your Walli Controller near your front doors so you can say goodbye to your home with just a single click.

Goodbye scene can:

- turn off all lights,
- decrease the temperature at your home,
- set shutters and curtains to a desired position,
- arm your alarm,
- lock your doors,
- close the gates or garage doors.

Just as you like it! – granular light control

There are other remotes which can trigger an action, but no other controller is that smart. Walli Controller can act just as your regular Z-Wave dimmer so you can dim the lights to any level you want.

Walli Controller:

- is a smart Z-wave remote,
- supports associations,
- understand other devices,
- can communicate with other Z-Wave devices directly.

Control them all! – smart living

Opening, closing, adjusting, changing the position of all shades or shutters in house can be tiresome. With Walli Controller you can control them all at once. Not only at once, but also to the very exact position, as this is not a simple button, but a smart switch.

Walli Controller:

- versatile smart controller,
- flexible and appropriate for many settings.

Good night! – put your home to sleep

If you didn't have switches at your bedside table, don't worry! Walli Controller is a hassle-free battery powered wall-mounted button which can be easily applied basically anywhere. Now you can set up your Good night scene you always wanted.

Good night scene can:

- arm areas which shouldn't be visited at night,
- send you an open window report to your smartphone,
- adjust bedroom temperature,
- lock front doors.

Too late for electrical changes? – battery for the rescue

You already finished your home? It's too expensive to add electrical installation here now? Walli Controller was prepared for situations like this. Whenever you feel there is a need for additional switch, just put Walli Controller there. It comes with double-sided tape, so you've got everything you need right of the box.

Walli Controller as a 2-way switch:

- can be added without prior electrical installation,
- can be configured in the FIBARO System to act as a switch in a 2-way installation, meaning it can turn on and off a single lighting source together with another Z-Wave switch.

Upgrade
from
a single
switch...

to
a double
without
a mess!

Upgrade your Walli! – more buttons without making a mess

Smart home gives you endless possibilities, but for that you will certainly need some buttons. You cannot be prepared for every scenario but with Walli Controller you don't have to. You can add additional Walli Controller to an existing Walli switch just by changing the cover plate.

Walli Controller:

- is compatible with Walli frames,
- don't need a flush-mounted box,
- can extend a single or double flush-mounted boxes*.

* Double/Triple cover frames sold separately.

About Walli Line

FIBARO Walli complete series of FIBARO smart outlets and switches based on Z-Wave technology will equip your home with versatile intelligence. The look of the series is inspired by a pearl - its timeless sophistication and beautiful shape that will complement any nifty interior.

In addition to smart switches and outlets, FIBARO Walli line offers the usual sockets found in homes, i.e. Outlets, Ethernet sockets, USB sockets, and coaxial TV/Aerial sockets.

THANK YOU
