HEATIT EEZEDIM 250W

Heatit eezedim is a rotary dimmer for many different types of light fixtures. The Heatit eezedim works on most low loads without causing flickering.

The dimmer is equipped with a toggle switch option. This allows you to turn on/off the load from an external switch.

Heatit eezedim is very well suited for LED, and fits into System 55 frames. When connecting low loads it is recommended to use a bypass.

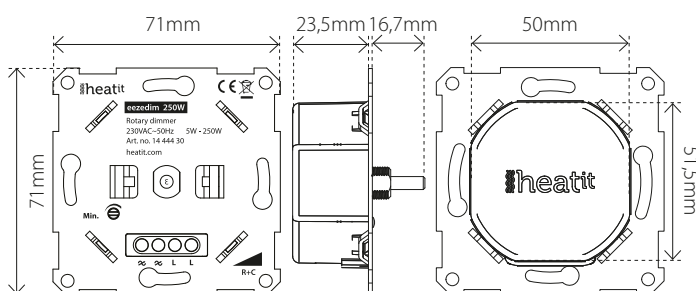

Included in package
