

ezlo atom 2

Next generation home control

The Ezlo Atom was named the US 2020 Consumer Product of the Year by the IoT Breakthrough Awards. The new Ezlo Atom 2 builds on that award-winning device with 50x more memory, making it faster, more powerful, and able to offer features previously unavailable on the Ezlo platform, all while maintaining a tiny form factor that's still the smallest in the industry.

IoT Breakthrough Award
Consumer Product of the Year

Key Features

Enables control of Z-Wave devices including lights, thermostats, door locks, sensors, and more

Control over 27,000 Wi-Fi devices associated with Amazon Alexa or Google Assistant using Ezlo VOI; also supports Siri Shortcuts

Plugs into any USB port with a consistent power source; Must be paired with the Vera app

Can be added as a secondary controller to an existing Z-Wave network

New EzloCast feature lets you control groups of devices—like all your first floor lights—simultaneously

Personalize your experience even more through advanced scene creation with and/or variables and grouping of triggers or actions

Make your system ultra-responsive with local control that keeps commands out of the cloud

Keep in touch with home from anywhere with notifications sent to your iOS or Android phone

Open API lets developers create new experiences
